### ABOUT

I am a creator and an analytical thinker by nature which is why web development is so attractive to me. I love the process of writing code to create something new, solve a problem, or build a new platform. As a natural "helper", having the ability to create something that will bring ease into someone's life or fundamentally change how they do things is truly rewarding.

### PROJECTS

#### SURVIVOR BRACKET...THE APP

Responsive CRUD application allowing users to submit their predictions for the TV show, Survivor season. Built in React and Reactstrap, allows my group of friends, who religiously watched Survivor make predictions for who would be kicked off and receive an updated score as the season progresses. This project encapsulated my love for community, competition, and overall problem-solving nature into one project.

#### USEBY APP

USEBY is a collaborative effort, born out of the Nash Hackathon. Built in React, USEBY allows a user to track the expiration dates of common food and see their money waste, if/when the food gets thrown away. I was honored to be apart of the planning stages of the app, pair coded part of the styling of the app and created a clear README and description of the app.

### EDUCATION

#### NASHVILLE SOFTWARE SCHOOL

C#/.NET FullStack Software Developer

#### UNIVERSITY OF NORTH GEORGIA

BS Psychology with Minor in Biology

### EXPERIENCE

#### FULL STACK WEB DEVELOPER

*Nashville Software School | July 2018 - Present*

- Source code version control and project management/tracking with Github Projects & Issue Tracking during multiple group projects.
- JavaScript fundamentals leveraging DRY, modular, readable code and reusable components
- Built browser-based single page applications using React, HTML, and CSS for Capstone, Survivor Bracket...The App
- Styled applications with CSS Frameworks, Bootstrap and Reactstrap, writing custom styles as needed
- Application design through white boarding dependencies and building ERD's during Nutshell, a group project.
- Created and modified database design/content using SQL, and ORM tooling
- Created RESTful APIs with C#/.NET using WebAPI
- Leveraged Razor for creating and editing MVC applications

#### EXECUTIVE ASSISTANT AND FINANCE OFFICER

*Lwala Community Alliance | Jan 2017 - Sept 2018*

*A non-profit that runs a hospital in rural Kenya*

- Coordinated office and conference schedule, while planning all logistics, for travel and meetings
- Managed donor services, directing the donor acknowledgement process.
- Gathered requirements to create and implement a yearly budget, keeping track of monthly expenses and paying outstanding invoices
- Used Quickbooks Desktop and Online to keep the U.S. finances and create reports needed to compare with the Kenya expenses
- Facilitated yearly Audit process, and kept Charitable Solicitations up to date
- Strategized student interns and volunteers recruiting efforts, and managed their schedules, making sure they had projects to take ownership on and insure their skills were best used

#### ADMINISTRATIVE ASSISTANT/OFFICE MANAGER

*Essential Audio Inc. | Aug 2015 - Aug 2017*

- Sort Mailed, answer phones, and managed filing system
- Prepared Invoices, PO's, orders and shipments
